A clear view of reading

Delivered by Hampshire SLS

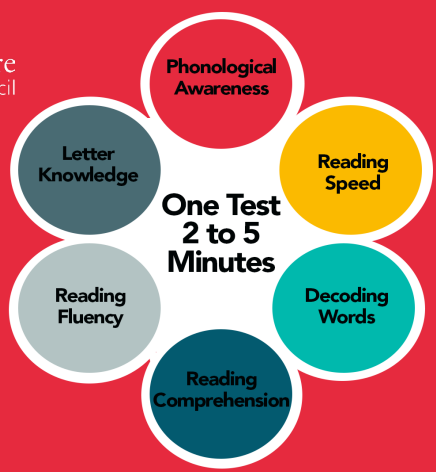

Combining extensive research with the latest AI in the first fully objective reading assessment, able to determine reading attainment and highlight children with specific difficulties, such as Dyslexia, all in a matter of minutes.

Lexplore

Hampshire
County Council

Eye movements can offer a unique insight into reading. Our AI based assessment can analyse a child's skills across key reading components, determine attainment, and highlight those with reading difficulties in a matter of minutes. It can, therefore, save months of assessment and discovery time.

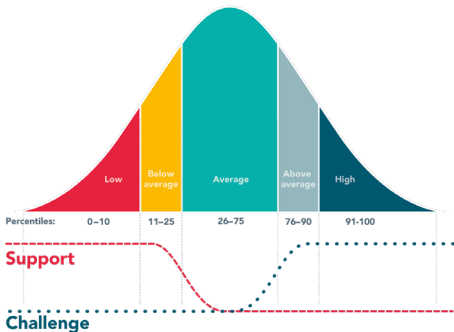

One simple method:

- 1) A pupil reads two passages of text one out loud and one silently.
- 2) An eye tracker records their eye movement patterns while reading.
- 3) Objective results are immediately available following AI analysis.

Percentile scores across 5 levels:
